[www.forexamerobot.com](http://www.forexamerobot.com)

## Introduction

I proudly introduce to you our NEW unique product - **Forex AmeroBot**.

"AmeroBOT is the Forex realization of my American Dream. I have personally contributed time and efforts to its development. My own trading experience and knowledge were converted into its algorithm. For the First time ever we implemented latest unique innovative features:

- Intelligent adaptive Money Management system
- SMART technology - Self-improvement and Self-correction
- SAFE algorithm – "install and forget"
- PROFITABILITY. You will not need any other robot. It will be your best Forex assistant"

### **AmeroBOT - your personal Forex assistant.**

It is not a simple robot. With AmeroBOT you can fully experience the FREEDOM of trading style – it is the FIRST ROBOT ON THE MARKET with Intelligent Money Management System.

Let the robot take care of your deposit as the most professional Forex trader in the world. It will define the Lot Size AUTOMATICALLY. What is more – it is capable of SELF-IMPROVEMENT and SELF-CORRECTON.

**Yours,**

**Rita Lasker & Green Forex Group.**

## Installation and Setup

Forex **AmeroBot** is a Bundle of plug-ins that requires MetaTrader 4 to function.

It is extremely important to update the trading platform often. If you run the previous versions of MT4 you may experience problems with installation.

Please contact your broker support to learn about the latest available build. At the moment the most actual build we use is 418 (depends on the broker), to check your build please open the menu **Help/About...**

The following message will appear:

Please note that each broker has its unique name in the left upper part of the window message, the build is mentioned there below.

If you already have MetaTrader 4 installed, place the following files:

**forex\_amerobot\_m15.ex4**  
**forex\_amerobot\_m30.ex4**

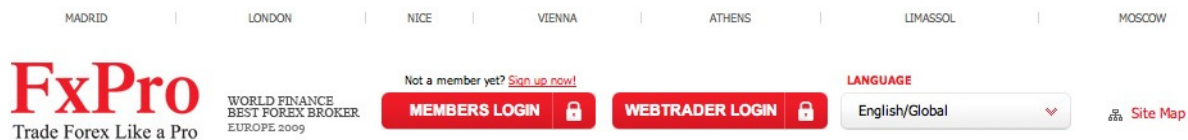

into **C:/Program Files/xxxxx/experts**, where **xxxxx** is the name of your MT4.

**For example**, the MT4 from FxPro is called **FxPro - MetaTrader**, and the complete path will look like this: **C:/Program Files/FxPro - MetaTrader/experts**.

Relaunch MetaTrader 4 and skip to **Step 3** below.

If you do not have MetaTrader 4 installed, you need to download it from a Forex broker web site. We recommend using only well known, reputable brokers that have been on the mark for a long time, such as:

FxPro <http://fxpro.com>

Alpari UK <http://alpari.co.uk>

### **Step 1**

Follow the links above, choose your Forex broker, and download MetaTrader 4 for free.

After you download MetaTrader 4, install it on your computer. This is a standard and simple operation.

### **Step 2**

After the installation of MetaTrader 4, please place the following files:

**forex\_amerobot\_m15.ex4**  
**forex\_amerobot\_m30.ex4**

into **C:/Program Files/xxxxx/experts**, where **xxxxx** is the name of your MT4.

**For example**, the MT4 from FxPro is called **FxPro - MetaTrader**, and the complete path will look like this: **C:/Program Files/FxPro - MetaTrader/experts**.

### Step 3

(if you have your own demo or your own real account already, skip Step3)

Launch MetaTrader 4 by selecting it from the Start menu.

When the application launches, it presents a window in which you need to enter your demo account details.

**Fill out all the fields carefully.**

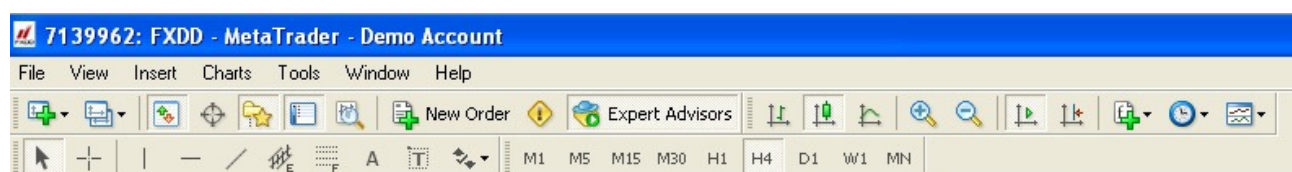

Selecting the "I agree to subscribe to your newsletters" checkbox makes the OK button available. Once you have filled out all the fields, click OK.

**Personal details**  
To open an account, please fill out all the following fields:

Name:	<input type="text"/>	min 6 chars
Country:	<input type="text"/>	State: <input type="text"/>
		min 2 chars
City:	<input type="text"/>	Zip code: <input type="text"/>
	min 2 chars	min 3 chars
Address:	<input type="text"/>	
	min 6 chars	
Phone:	<input type="text"/>	Email: <input type="text"/>
	min 6 chars	name@company.com
Account Type:	<input type="text"/>	Currency: <input type="text"/>
	forex	USD
Leverage:	<input type="text"/>	Deposit: <input type="text"/>
	1:100	5000
<input type="checkbox"/> I agree to subscribe to your newsletters		

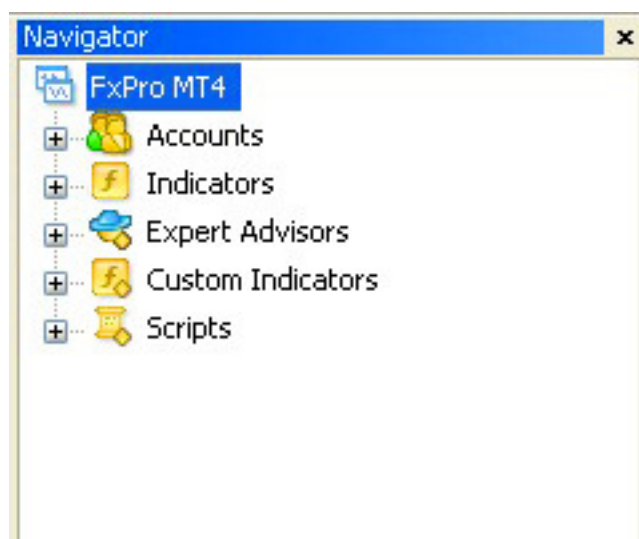

When you click OK, your demo account will be registered and you will be signed in with the system with your demo account details.

Your account number is displayed on the left of the window title. If you see it there, it indicates that your account has been registered successfully and you have logged in the system.

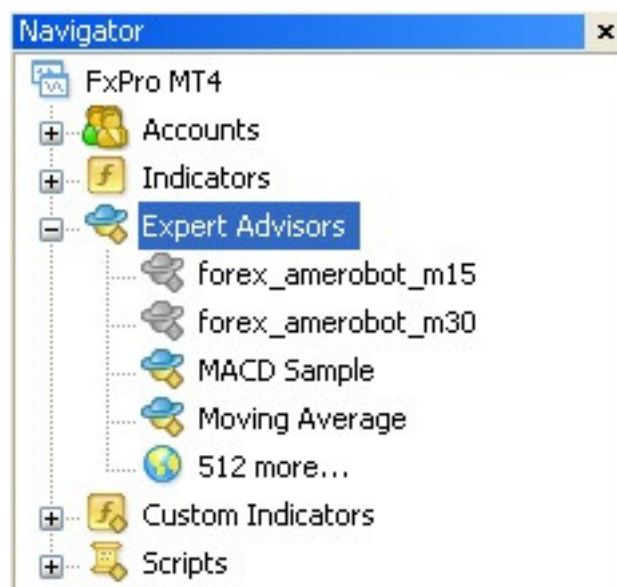

#### Step 4

Take a look at the Navigator panel on the left of the main window.

The Navigator panel displays all the accounts, indicators, expert advisors, custom indicators, and scripts available to you. Let's focus on Expert Advisors for now.

If you followed the simple instruction above, you should see **forex\_amerobot\_m15** and **forex\_amerobot\_m30** under Expert Advisors.

If you don't see it there, please make sure you have placed the files **forex\_amerobot\_m15.ex4** and **forex\_amerobot\_m30.ex4** in the correct folder, as described above.

**Relaunch** MetaTrader 4 a few times and check Expert Advisors again. If **forex\_amerobot\_m15** and **forex\_amerobot\_m30** are still not listed there, contact our technical support by sending an email to: **support@ritalasker.com**

## Step 5

Open the following charts in MT4:

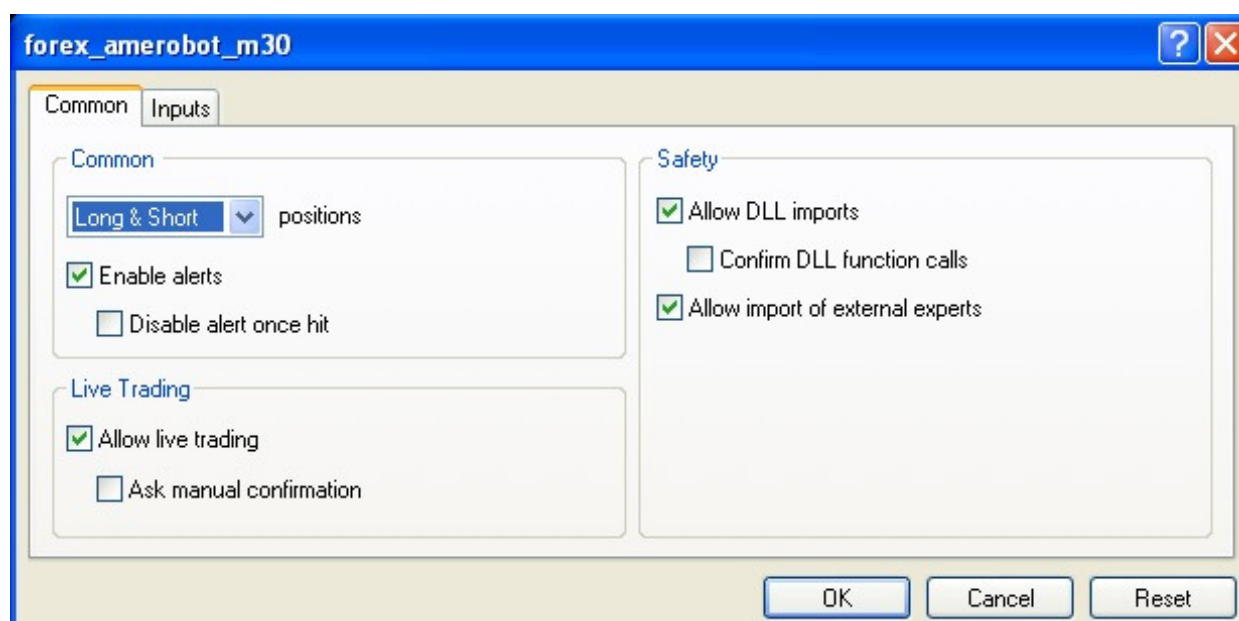

**EURUSD M15** for **forex\_amerobot\_m15**

**EURUSD M30** for **forex\_amerobot\_m30**

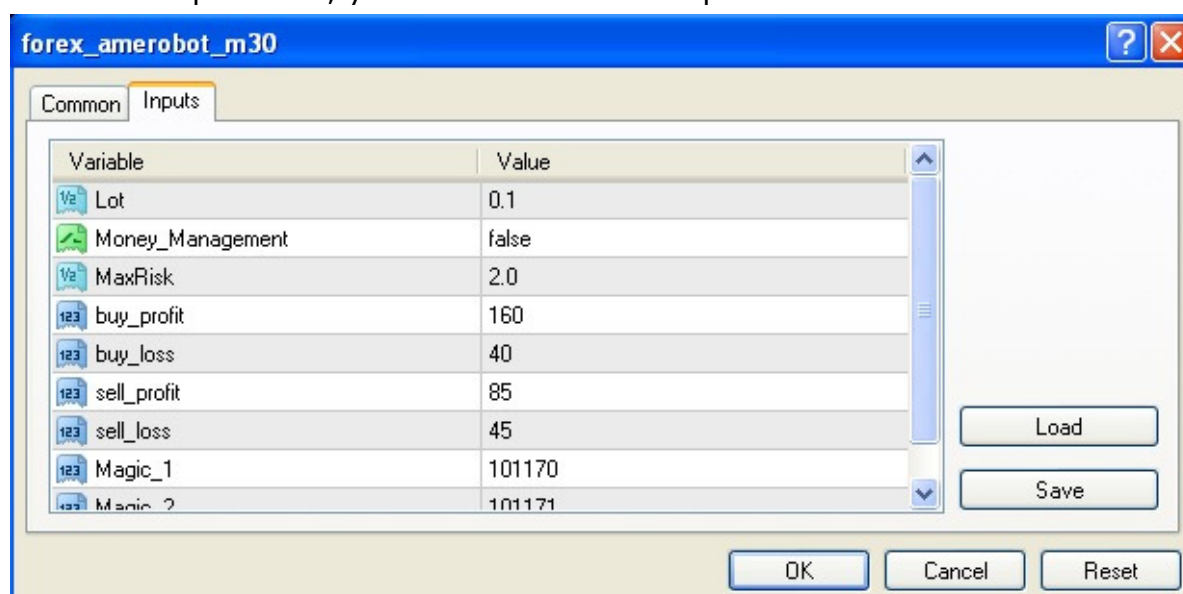

Drag and drop **forex\_amerobot\_m15** and **forex\_amerobot\_m30** from the Navigator panel to the charts.

**We do not recommend using another currency pairs and timeframes!**

A window with the Robot settings appears. Please, make all the settings in the **“Common”** tab the same as in the picture below:

In the “Inputs” tab, you’ll find the **variable** parameters of the robot:

**Lot:** the fixed Lot Size if you disable Money Management

**Money\_Management:** **false** – to disable Money Management, **true** – to enable it.

**Important!** *If you set Money\_Management as true it will ignore the fixed Lot Size (Lot). In this case the robot defines the Lot Size automatically depending on the maximum risk level (MaxRisk)*

**MaxRisk:** the maximum risk for the each trade. If you set Money\_Management as true, you need to define the maximum risk level here.

The maximum risk is to be set by you as a percentage. For example, selecting 2% of risk, the robot will pick up a Lot, where the maximum possible loss will be not more than 2% of the current amount of your deposit.

### Consider it!

Before enabling Money Management we highly recommend you to read more about it in the Internet and make sure you know its basic principle.

The maximum drawdown is about 50 pips. If you are using standard lots (not micro), the minimum risk of 2% can be applicable only for the deposit starting with \$2500:

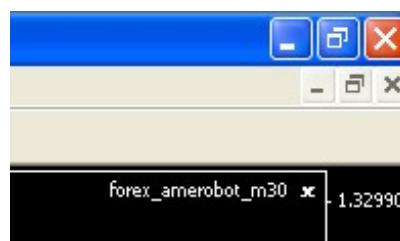

- If you deposit is less than \$2500, you can either increase the risk, or choose a fixed Lot.
- If you cannot calculate the risk, please feel free to disable the Money Management System and trade with fixed Lot Size – just like with the regular robot.

The rest of the settings please leave default. They are open for the experienced traders who know what they mean. Please do not change them if you are not sure what the result will be.

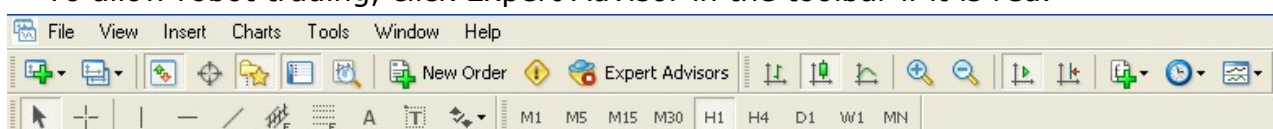

Click **OK**

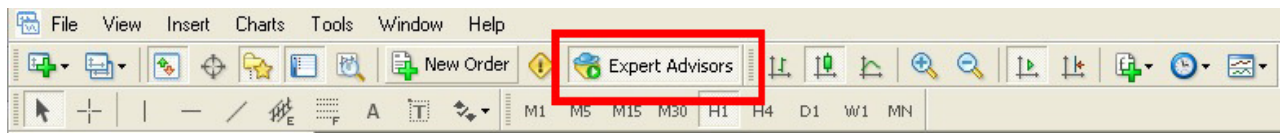

## Step 6

In the top right corner of the terminal window you should see the name of the robot with a cross next to it. This indicates that your robot has been activated but your terminal does not allow algorithmic (robot) trading.

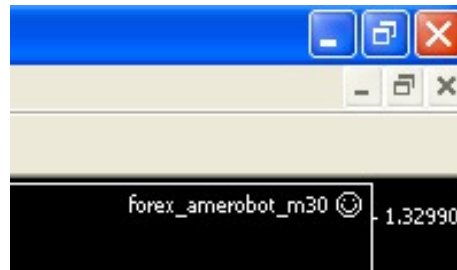

To allow robot trading, click Expert Advisor in the toolbar if it is red.

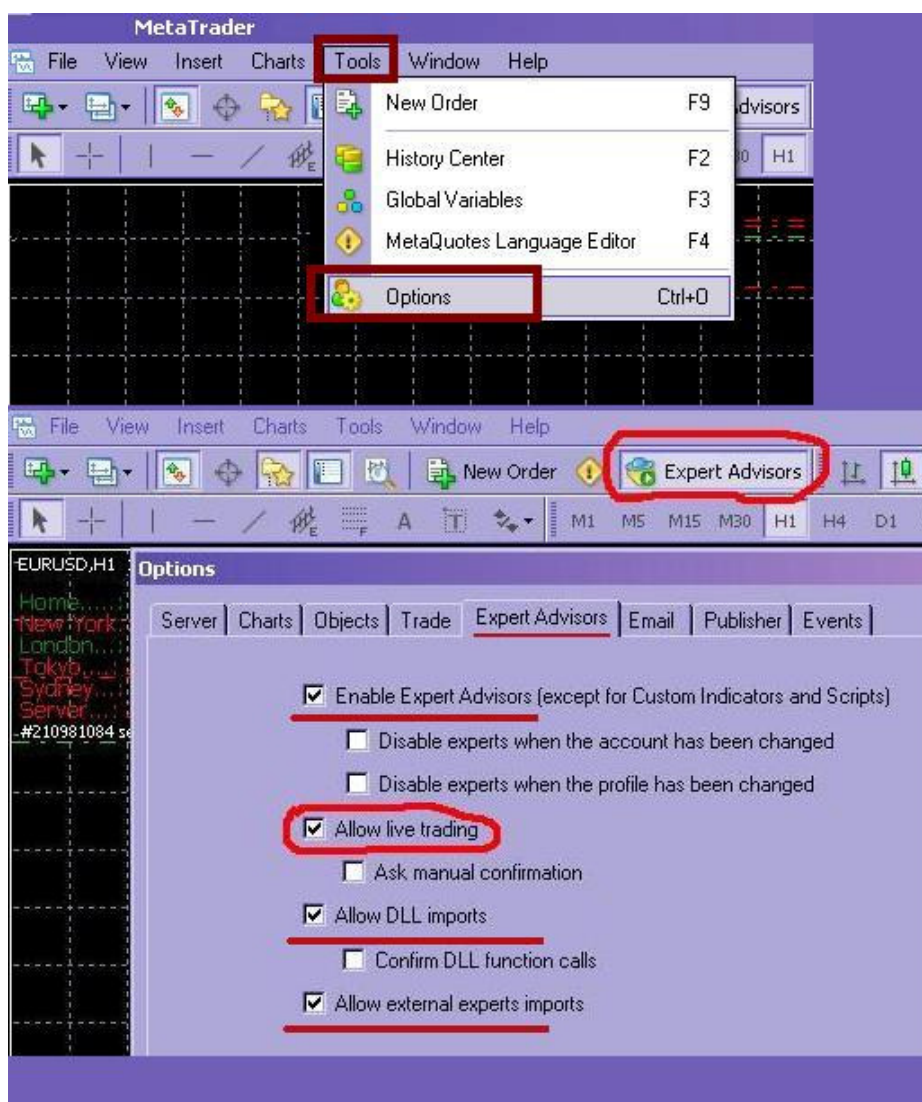

Once you click Expert Advisor, a smiley face will appear next to the robot name, instead of the cross.

Great. You have successfully installed, set up, and launched the robot.

Just to make sure that you have enabled live trading, please double check that you have the same settings in MetaTrader4 options:

If everything is the same, it will trade, open and close order automatically and completely independently without any intervention on your part. You can watch the results of its work in the computer screen.

The bottom part of the window displays the trading and their results in two tabs: Trade and Account History.

If you do not see the tabs, press **CTRL+T** on the keyboard to display the trading window.

We strictly recommend you to activate the "Comments" field in the "Trade" and "Account History". It will help you to define which robot is placing orders now.

If you have any questions, please feel free to ask our support team by sending an E-mail to: [support@ritalasker.com](mailto:support@ritalasker.com)

We will do our best to help you.

**Yours,  
Rita Lasker & Green Forex Group.**
